

SOFRAPACK

**SPECIALIST OF
CUSTOM PACKAGING
SOLUTIONS**

**FOR NATIONAL AND INTERNATIONAL
FREIGHTS OF ANY KIND OF PRODUCTS**

I NNOVATIVE SYSTEM

of custom crates in very strong cardboard

**RESISTANT
EASY TO USE
COST EFFECTIVE
ECOLOGICAL**

The Sofrapack crates have been designed to be superior to wood for: cost protection, vibration, fast set-up and no treatment required.

Sofrapack is the only one distributor for Europe of the American system of the company Woodfree Crating who owns the worldwide patent for all products : A revolution in the packaging industry.

Our crates offer, by the patented new technology, another better solution to wooden crates.

WoodFree
Crating

Custom manufacture for industrials who need specific packaging for their shipments.

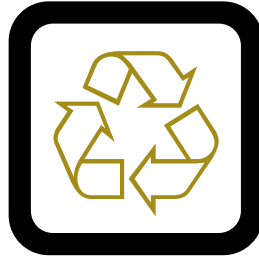

Forget the wood, let's use the cardboard

Any dimensions available under 48h

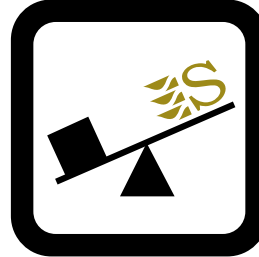

NO ISPM15

Crates in cardboard and OSB who don't require any treatment or fumigation

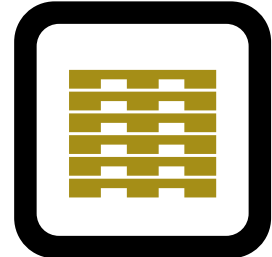

ENVIRONMENT

Reusable, recyclable and no cost disposal for destruction

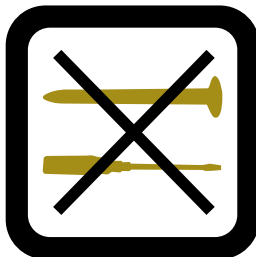

LIGHT

Sofrapack crates are 2x lighter than wooden crates

EASY TO STORE

Delivery and storage flat
Pallet in cardboard with feet glued and nailed

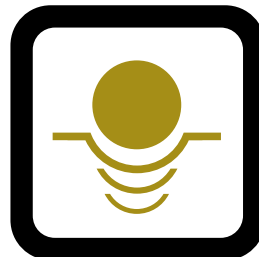

EASY TO USE

No tools required, no dirt, no screw, no hammer

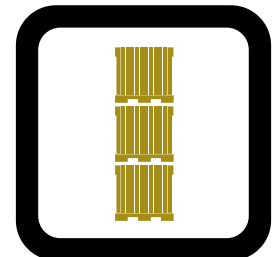

WATERPROOF

Can put a plastic film to strap the crates against the humidity

RESISTANT

Damping of the shocks guaranteed and 50 % less vibrations

EASY STORAGE

Several stacks possible

Superior to wood for:

Handling (Easy assembly and disassembling)

Cost (lighter and timeless)

No treatment or fumigation ISPM15 required

M. Le Gall
Operations manager
CROWN WORLDWIDE SAS

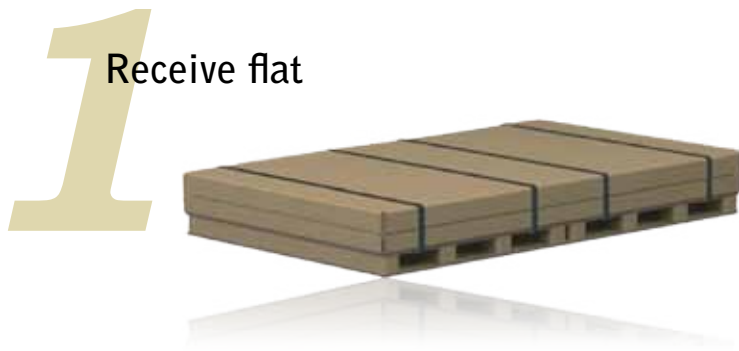

"International moving and relocation company, we used to pack in wooden crates but we have been replaced them for 4 years by cardboard crates of Sofrapack company : custom crates (for flat screen TV, motorbike, painting, chandelier, furnitures, etc), Liftvans and airfreight crates.

Sofrapack crates have only advantages compared to wooden crates : good price, light weight, easy and fast set-up, good resistance, storage flat and most of all no more problems with the ISPM15 regulation and availability of the crates under 48h.

For all these elements, I recommend the Sofrapack products who have all our trust."

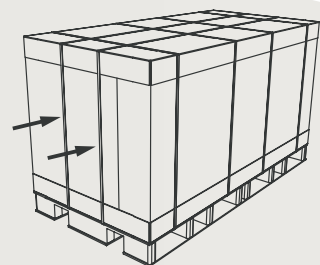

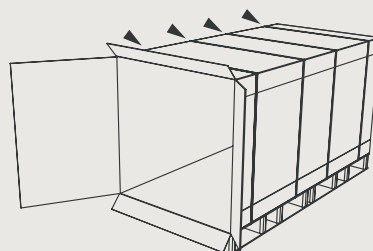

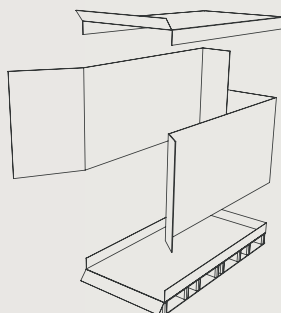

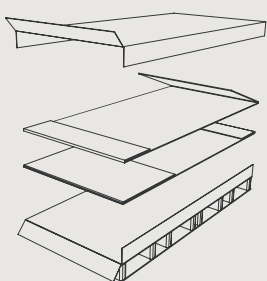

EASY AND FAST SET-UP

thanks to the innovative patented design

No tools needed, No competence required

Assembly (1 people + 1 strapping machine) : 5 minutes !

COST REDUCTION

while deleting indirect costs

Save up to **60 %**
on your packaging
expenses!

*Example of saving made on
Liftvans of 6cbm (220x120x220)*

Crate assembly cost

Sofrapack crate cost

**SOFRAPACK
CRATE**

Wood disposal cost for
destruction

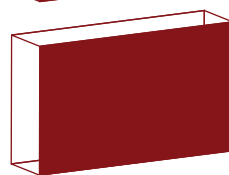

Unpacking cost

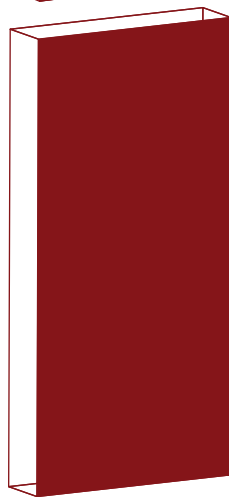

Additional Freight

Crate assembly cost

International wood surcharges
ISPM15 cost (for fumigation)

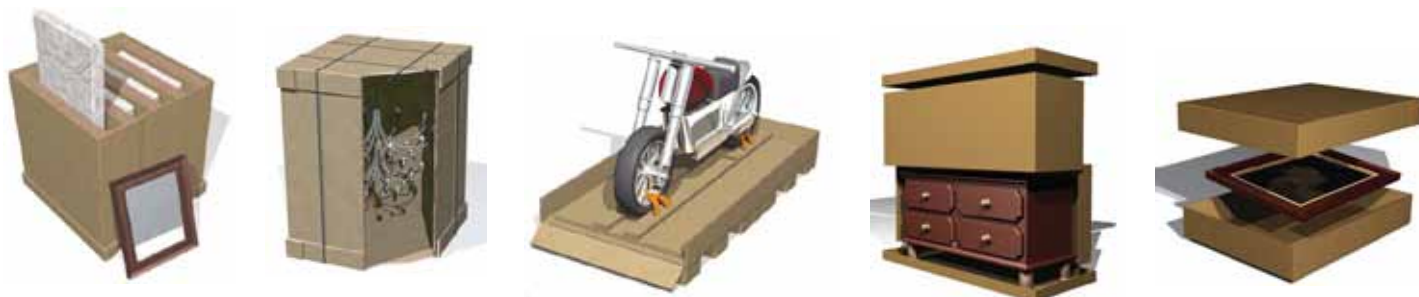

Wooden crate cost

**WOODEN
CRATE**

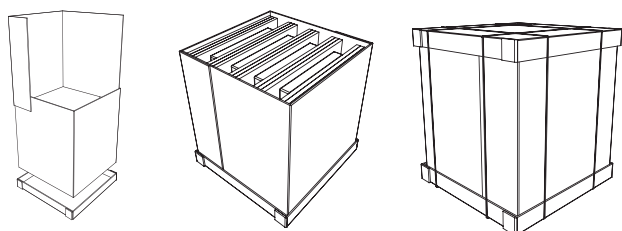

CUSTOM CRATES

for motorbikes, flat screens, pictures, chandeliers and even pianos!

*We manufacture crates of any dimensions
for any kinds of products*

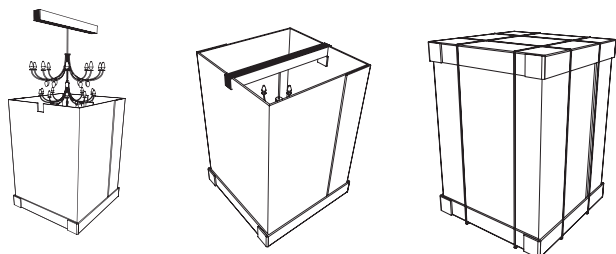

SINGLE OR MULTI-PICTURES CRATE

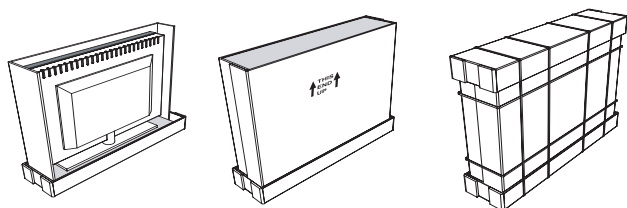

Absorbing up to 50 % of the vibrations, pictures and frames will be very well protected with our crates : made for one or several pictures (according to dimensions and value of each).

CHANDELIER CRATE

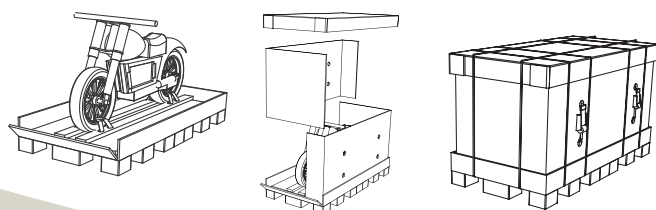

The chandelier is suspended into the crate thanks to a strong horizontal bar. The protection and stability are guaranteed during the transport.

FLAT SCREEN CRATE

Very resistant and protective crate, the flat screen can support any shocks during the transport.

MOTORBIKE CRATE

Immobilization of the motorbike guaranteed by specific attaches allowing to strap inside the crate.

LIFTVANS & AIR FREIGHT CRATES

for international movers and industrials

We manufacture crates of standard sizes for international sea and air freight

LIFTVANS: FROM 1 TO 6 M³

The 6 cbm crate (the LV48) is the most required size for sea freight.

Specifications

All liftvans come with very strong cardboard pallet

Outside dimensions: 221x120x221 cm

Inside dimensions: 214x116x207 cm

Delivery dimensions: 221x120x25 cm (flat and stacked by 10)

Weight: 75 Kg

AIR FREIGHT CRATES: FROM 1 TO 4 M³

Our air freight crates come also with cardboard pallet (composed with feet glued and nailed).

Light : they are very good for air freight (taxed on weight).

Don't exceed 1.60 m high (which is the maximum authorized for air freight)

*With our crates :
No more administrative and
financial problems regarding the
ISPM15 regulation for wood
(Any packaging in wood (crate and pallet) have
to be fumigated for any international transport:
long and expensive)*
